Viktor Hamburger, Professor Emeritus of Biology

Affiliation Biology Department

Washington University

One Brookings Drive

St. Louis, MO 63130-4899

Comments:

I have known the applicant for about 6 years as a graduate student and a personal friend. She took a graduate course with me and showed an unusual interest and insight in the discussions. I have had no part in her research activities, but we discussed her work frequently. I have a high opinion of her intellectual and research capabilities, and I know that she is strongly motivated for research. She is absolutely reliable and has the highest standards of integrity.

Signature _____ Professor Emeritus

Date _____
