

August 10, 1951

Dear Prof. Hamburger:

Thank you very much for your kind letter of July 14th. I am very sorry to hear that Mrs. Hamburger is in illness. I and my family sincerely hope that she will get recover soon. My friends in my lab. also with great concern & hope she will get better when they are regret to know the news, they all know you by the photo and are so interest in your techniques & the important discoveries in the chick neuroembryology.

It is really a good news for me that my paper has been accepted for publication in the J. of experimental zoology. Thank you very much & to the dept. for the kindness of ordering of 100 reprints for me. I am so glad to write you and I hope you will ask Mr. Breyman or Jean to ship them to me by separating them into 2 groups ~~for the safe of~~ parcel post for the safe if it is not too much trouble, one group send to my Hongkong address (c/o Mr. S. Y. Liu, 166 W. Wing Lok Street, Hongkong); the other send to my present address (Dept. of Anatomy, Dairen medical college, Dairen, China) and I would appreciate very much if you will tell Jean to distribute my paper in the United States to each of the following zoologists: Dr. Hsi Wang, 6030 Ellis Ave. Chicago 37, Ill., Dr. M. C. Nim, Dept. of Biology, Stanford University, Dr. Sue Lumb, Dr. B. Mummore, Rochester U. N.Y., Dr. F. C. Dunn, Pathology dept. Temple U. Hospital, Broado Ontario St. Phil. 40, Pa.

Dairen is a good place for the summer time, the vacation here just begin yesterday, I am going to stay here & continue my work. My family is also here with me. We get a house from the school, furnished, with a beautiful garden, facing the ocean. At Sunday we always spent the ~~all~~ ^{whole} day in the sea shore. However, Dairen is not so good in winter, it is too cold (20° under zero), so I also wonder how long I can stay ~~that~~ ^{such} far north place. Dr. S. C. Wang, now the dept. head of Biology, Nanking U. asked me several times come back to Nanking. I would consider it for the next year if they will ~~not~~ cut down somehow of the teaching time for me.

I am so glad to know the news at Kestock, when I sit down & recall the events when I was there, it is so interesting & seems I ^{was} still there. I think of you all. I hope you all getting well & good luck.

I am much obliged to you for your kindness, I wish you the best of luck. I hope you will write me soon and give me more & more advice. Thank you again, I am

very gratefully yours
Paul S. P. Shieh

Letters can be sent directly to my present address, because I have received 2 letters safely from my friends who ~~sent~~ sent ^{me} their letters in the United States. On the other hand, I get difficulty when I send out my parcel post to the U.S. even via Hong-kong. 2 weeks ago, I get back 2 parcels from the post office which I want to send them to you & Dr. Levi-Montalcini. Maybe we wait until the Korean situation clear up. sincerely yours
Paul
